

# Post-Doctoral Research Position in Division of Nanotechnology

IMNiTP

## Koszalin University of Technology, Poland

Applications are invited for a postdoctoral position in the Division of Nanotechnology within IMNiTP at Koszalin University of Technology. The candidate must have significant expertise in the area of magnetron sputtering. Successful candidate will participate in a vibrant interdisciplinary research group and be involved in projects preparing nanostructured carbon films by means of magnetron sputtering.

The primary responsibilities of this position are as follows:

- Performing experiments related to an EU funded project devoted to carbon hard coatings.
- As a senior researcher in the research group, s/he is responsible for leading junior researchers.
- Having the responsibility for the thin film lab equipped with a series of magnetron sputtering instruments.

### Requirements

- A Ph.D. in materials science, physics, or chemistry.
- Working experience in magnetron sputtering and thin film technology.
- A good record of publications.
- Strong verbal and written communication skills.

The position is available immediately for a period of one year and may be renewed thereafter. Actual start date is negotiable. Applications will be reviewed immediately and continue to be accepted until the position is filled. Interested candidates should submit a CV, a cover letter describing their research experience and interests, and the names and email addresses of at least three references to:
